Projects

Success + Dress

Created a mock e-commerce application using React. Backend built and populated using Strapi CMS, routes written in React Router, styling done using SASS. Cart functionality created using Redux.

Social Meatia (General Assembly Capstone)

Wrote a full-stack mock social media application with full CRUD capability. Backend written using Node, Express Router, MongoDB, and Mongoose. Responsive frontend written in React using webhooks and styled with CSS.

GCI Villain Database

Built a website cataloging villains in the Adult Swim show *Venture Bros*. Backend written using RESTful routes connecting Express and MongoDB. Frontend written using Javascript and EJS partials, styled with CSS.

Potted Pals

Crafted a backend API service for a group project. Populated a MongoDB collection and wrote REST routes using Express. Utilized Mongoose and Node.

Tug of Words

Created multiple HTML pages for a word-unscrambling tug of war game. Built Javascript functions to handle game events and mechanics, as well as navigation and state-changes.

Bunnigotchi

Single-page web-based tamagotchi game using the foundations of web applications. States written using HTML and managed by Javascript functions. Styled by CSS.

Previous Experience

Delivery Driver (Absopure Water & Rummy Inc)

(12/2019 - 08/2022)

Delivered products to business and residential customers in Southwest Illinois. Maintained schedules, interfaced with customers, organized inventory, and kept regular records. Drove professionally without incident and ensured timely, professional service across long distances.
